All other listed A-Constants are data from HumanOptics AG.

<sup>2</sup> The A-Constant of the SRK II formula is not subject to any further adjustments.

<sup>3</sup> The ACD-Constant of the Holladay 2 formula refers to the manufacturer's constant and is not subject for optimization.

For Chinese patients other constants are recommended for the model DIFF-aA/-aAY. Please contact [customerservice@humanoptics.com](mailto:customerservice@humanoptics.com).

This information is supplied without liability. It is always recommended to use personalized IOL constants by the surgeons on the basis of the surgeon's own clinical experience, the surgical techniques, the used measuring devices and postoperative results to achieve best prediction results. Further information is published on the website <http://ocusoft.de/ulib/relat.htm>. The values specified above are only start values and guidance for the calculation of IOL power.
