IOL DESIGN

Location: capsular bag

- ◯ monofocal
- ◯ trifocal
- ◯ toric
- ◯ toric-trifocal

Additional options

- ◯ blue-light protection
- ◯ XL optic
- ◯ Safeloader

PATIENT DATA

ID: | year of birth:

	Right (OD) mm	D	axis		Left (OS) mm	D	axis
K1				Standard keratometry index **1.3375**			
K2				If other:			

	Right (OD)		Standard biometry: **IOLMaster** or **A-Scan Immersion**	Left (OS)	
axial length					
phakic ACD			If other:		
lens thickness					

	Right (OD) sph	cyl	axis	BCVA	**(stable) subjective refraction** standard vertex distance 12.0mm	Left (OS) sph	cyl	axis	BCVA
					If other:				

	Right (OD) SE	sph	cyl	**target refraction**	Left (OS) SE	sph	cyl

	Right (OD) D	axis	**planned induced astigmatism and incision angle**	Left (OS) D	axis

additional information		**previous eye surgery?**		additional information
	☐	refractive surgery	☐	
	☐	keratoplasty	☐	
	☐	other	☐	

Disclaimer of warranty: On the basis of biometric data previously determined and provided by medical specialists, HumanOptics Holding AG calculates non-binding IOL-recommendations. All recommendations are merely approximate values based on general experience and a calculation algorithm. They do not entitle the user to employ it without verification in practice. No liability is assumed for medical accuracy, direct, indirect or consequential damages related to the recommendations.
